FACULTY POSITIONS AVAILABLE CANCER IMMUNOLOGY RESEARCH

Rutgers Cancer Institute of New Jersey (CINJ), Rutgers Biomedical Health Sciences Institute for Infectious and Inflammatory Diseases (i3D), and Rutgers New Jersey Medical School in Newark are jointly recruiting junior to mid-level tenure-track faculty specializing in Cancer Immunology that could complement and expand growing programs in basic and translational research. Recruited faculty are expected to have significant publications and, for mid-level faculty, a history of grant funding, and to establish an innovative, independent and collaborative research program addressing significant and fundamental questions in the area of cancer immunology. Interdisciplinary and translational approaches are encouraged that establish collaborations with i3D and CINJ consortium faculty.

Rutgers Cancer Institute of New Jersey is one of only 45 NCI-designated Comprehensive Cancer Centers, the only such center in New Jersey, and a leader in laboratory, clinical, prevention, and public health science (www.cinj.org). i3D includes world-renowned faculty performing cutting edge basic and clinical research at the crossroads of inflammation and infectious disease with outstanding core facilities (<http://research.njms.rutgers.edu/i3d/index.php>).

Qualified candidates must have a PhD and/or MD, or equivalent graduate degree, and outstanding academic credentials. Rank will be commensurate with experience. Women and minorities are encouraged to apply.

To apply, please visit: <http://jobs.rutgers.edu/postings/45407>

Rutgers, the State University of New Jersey, is an Equal Opportunity/Affirmative Action employer, and is compliant with the Americans with Disabilities Act (ADA).
